

## Hardware Catalogue

This mock up is to show the intent for the 'hardware catalogue'.

All hardware needed throughout the guest journey will be listed here. Users will click on a link next to the item in the 'brand standards spreadsheet'. It will either take them to a contents page from which they will be able to navigate to their chosen item or go directly to the item in the catalogue, (currently active). NB: We want to test both routes.

Either way, the 'hardware catalogue' is then a stand-alone document which can be referenced and used separately.

There will be 2 categories of products:

1. Specified standards

All necessary information needed to make an informed purchase is included in the Brand standards spreadsheet, and a summary repeated in the 'hardware catalogue'. E.g. hairdryer.

2. Specified product

A specific product has been selected for hotels to order. There will be a link to PW or external supplier – tbc. E.g. blue tooth speaker and disposable amenities (toothbrush, razor etc)

In time this should be an online resource/ portal for end to end purchasing
